

Obtain natural-looking
prostheses

NATURAL LOOKING PROSTHESIS

THIS COURSE IS FOR YOU IF YOU ARE...

- a dentist or lab technician tired of doing conversation, verification jigs, try-in and repeats when the prosthesis doesn't fit the first time
- looking for a consistent workflow with guaranteed passive fit and predictable results
- interest in improving the quality of your restoration while reducing costs, work, delivery times and patient appointments
- looking for the right foundation to scale your work to *10 full arch restorations per month and more

DIGITAL = VIRTUAL patient

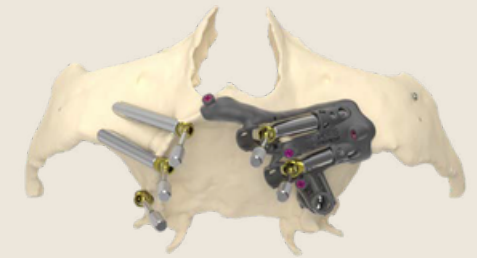

With the wide range of digital tools that surrounds us, we have carefully selected the most appropriate and purposeful ones.

The purpose of this course is to introduce you to some of the digital protocols we have developed and are currently developing in our clinic.

DIGITAL TOOLS IN MODERN IMPLANT PRACTICE

We will demonstrate how investing in digital technologies and properly integrating them into everyday implantology practice can make it more predictable and efficient.

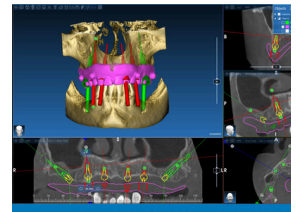

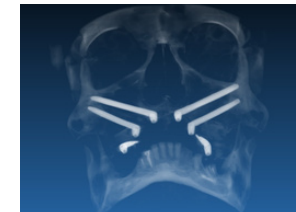

- DIGITAL BACKWARD PLANNING
- FP1 or FP3
- GUIDED OR NAVIGATED
- IMMEDIATE LOADING
- DIGITAL IMPRESSION (PHOTOGRAMMETRY)
